ILLUSTRATIVE TEST SCENARIO — not a real customer or recovery | Generated 2026-11-22 02:36:00 UTC

Finding: Potential discrepancy - review required | Confidence: High
Review: Open | Reviewer: Unassigned

Billing period: October 2026 | Native currency: ZAR

Contract versus invoice

Confirmed contract	**R2,400 ZAR**
Compared invoice amount (excluding tax)	**R1,800 ZAR**
Recorded period difference	**R600 ZAR**

Exact calculation and conditional exposure

R2,400 ZAR − R1,800 ZAR = R600 ZAR for October 2026. Potential annualised impact: R600 ZAR × 12 = R7,200 ZAR if the same recurring difference continues for a year. This is not historical or recovered revenue.

Conditional annual projection. The recurring difference must continue for a year; no recovered funds are established.

Recommended review action

Review the confirmed contract terms, invoice period and calculation with finance, then confirm the discrepancy or record an exception.

Completing an internal review does not prove billing alignment, collection or recovery. Verified recovered funds are not recorded by this release.
